

Carbon Balanced Audit Report

Neutral Territory

1 January - 31 December 2020

Summary

With the information you provided we have calculated* the carbon emissions associated with your premises at Claydon Court, over the stated reporting period. The results are shown in the adjacent table where we set out your total emissions of carbon dioxide (tCO₂e**) by source and the cost of Carbon Balancing with World Land Trust. Your company's emission levels from the previous year are summarised on the following page.

* We use Defra guidance and emission factors
(<http://www.ukconversionfactorscarbonsmart.co.uk>)

** tCO₂e is tonnes of carbon dioxide equivalents

Our Carbon Balanced approach

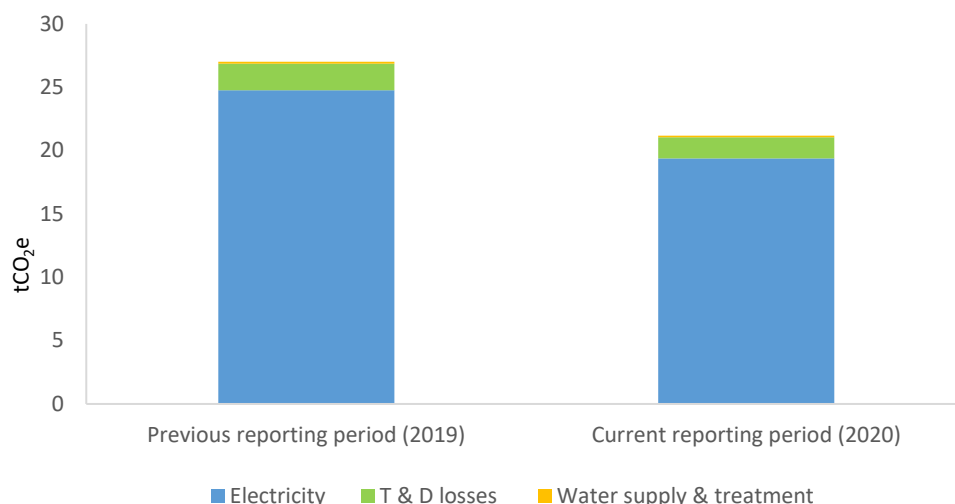

Carbon Balanced offsetting focuses on taking a balanced approach to your emissions.

World Land Trust recommends that companies assess and reduce current emissions, before offsetting unavoidable emissions through impactful conservation projects.

By choosing to offset through our Carbon Balanced programme, you are supporting biodiversity conservation and restoration projects around the world. Carbon Balanced projects are currently taking place in Ecuador, Guatemala, Mexico and Vietnam.
